PROFESSIONAL SUMMARY

Platform Enablement leader with 16+ years bridging deep-tier engineering logic and operational workflows. Manages and develops engineers; owns escalation prioritization and root-cause governance; and standardizes triage frameworks, decision trees, and troubleshooting playbooks. Strong technical literacy — advanced SQL debugging, log analysis (Datadog/Observe/KQL), API testing (Postman/cURL), and source-code comprehension. Pioneers AI-augmented operations with GenAI tooling (GitHub Copilot/Gemini/Claude) and synthesizes systemic friction from telemetry and ticket patterns into data-backed business cases for Product and Engineering leadership.

CAREER SNAPSHOT

16+ Years in IT / Cloud / Reliability Engineering
100% SLA Across 20+ Mission-Critical Services
30-35% Incidents Auto-Resolved via AI Automation
25,000+ Stale Incidents Eliminated
85%!98% Operational Efficiency Lift
15-32 Engineers Led Across Global Teams

KEY ACHIEVEMENTS

- Pioneered AI-augmented triage with GenAI tools (log summarization, code comprehension, SQL generation) driving 30-35% auto-resolution / best-in-class MTTR.
- Owned high-impact escalation and root-cause governance, streamlining bug-fix and development cycles with Engineering.
- Standardized triage frameworks, decision trees, and 175+ playbooks to scale self-service resolution across Tier-1 support.
- Eliminated 25,000+ stale incidents and 500+ alerts by maintaining triage queue integrity and SLA/SLO baselines.
- Translated high-severity technical blockages into business-ready impact statements for executives and stakeholders.

TECHNICAL COMPETENCIES

Leadership & People: Team Leadership & Mentoring, Career-Development Pathways, Performance Metrics, Continuous-Learning Culture, 1:1s & Coaching

Escalation & RCA Governance: High-Impact Escalation Ownership, Root-Cause Analysis, Problem Management, Bug-Fix Cycle Streamlining, Cross-Functional Resolution

Technical Troubleshooting: Advanced SQL Debugging, Log Analysis (Datadog / Observe / KQL), API

Testing (Postman / cURL / JSON), Browser DevTools, Source-Code Comprehension

AI & Automation: GenAI Tooling (GitHub Copilot / Gemini / Claude), AI-Augmented Triage, Log Summarization & Code Discovery, Scripting Frameworks (Python/PowerShell), Process Automation

Knowledge & Communication: Confluence / Documentation Strategy, Decision Trees & Playbooks, Business-Ready Impact Summaries, Executive & Stakeholder Communication

Operations: Triage Queue Integrity, SLA / SLO Baselines, Telemetry & Ticket-Pattern Analytics, Self-Service Enablement

TECHNICAL PROFICIENCY

Team Leadership & People Development — **Expert**

Escalation & Root-Cause Governance — **Expert**

Advanced SQL & Log Analysis (Datadog/Observe/KQL) — **Advanced**

API Testing (Postman/cURL) & DevTools — **Advanced**

GenAI Tooling (Copilot/Gemini/Claude) — **Advanced**

Knowledge Management & Documentation — **Expert**

Triage Queue & SLA/SLO Operations — **Expert**

Stakeholder & Executive Communication — **Expert**

PROFESSIONAL EXPERIENCE

Platform Enablement & Escalations Manager — Xbox Cloud Services

Microsoft Corporation (via TechMahindra) | Redmond, WA | May 2021 - Present

Bridges client-facing operations and core Engineering for a 24/7/365 platform; standardizes triage frameworks and drives systemic improvements.

- Mentor and manage a team of engineers, establishing career-development pathways, performance metrics, and a culture of continuous learning.
- Act as final operational authority for high-impact escalations — oversee prioritization and resolution of complex workflow failures and system anomalies, collaborating with Engineering to streamline bug-fix and development cycles.
- Serve as cross-functional liaison, synthesizing high-severity technical blockages and system patterns into clear "business-speak" impact statements for executives, Tier-1 support, and stakeholders.
- Own knowledge-management strategy — built standard decision trees and troubleshooting playbooks (175+ runbooks in 5 months) in Confluence-class tooling to scale self-service resolution.
- Maintain triage queue efficiency with SLA/SLO baselines and workflows that prevent stale issues from lingering — eliminated 25,000+ stale incidents and 500+ redundant alerts.
- Aggregate telemetry and ticket patterns (Kusto/KQL, Power BI) to isolate systemic platform friction, presenting data-backed business cases to Product and Engineering leadership.
- Pioneered AI-augmented operations — adopted GenAI tools (GitHub Copilot-class) for log summarization, code comprehension, and SQL/script generation, driving best-in-class MTTR (30-35% auto-resolution).
- Cultivated collective intelligence — cataloged investigative techniques, automated scripts, and AI prompts in shared technical channels.

Technical Support & Platform Enablement Lead — Customer Support Services

Microsoft Corporation (via Mindtree) | Redmond, WA | Nov 2016 - May 2021

Led a 15-engineer team bridging deep-tier engineering logic and operational support workflows.

- Mentored and managed a 15-engineer team; established performance metrics, escalation paths, and continuous-improvement practices.
- Standardized triage frameworks and troubleshooting playbooks that optimized the product-to-support lifecycle.
- Debugged complex issues via advanced SQL queries and log analysis; isolated front-end vs. back-end failures and correlated client-side errors with backend logging.
- Translated complex technical issues into structured, business-ready impact summaries for non-technical audiences.

Operations & Escalation Lead — Azure Live Site

Microsoft Corporation (via Mindtree) | Hyderabad, India | May 2012 - Nov 2016

Led 12 senior + 20 engineers running triage, escalation, and root-cause governance at 99.95%+ SLA.

- Built scripting frameworks and advanced data queries automating repetitive support and verification tasks.
- Ran root-cause governance, problem management, and change management; mentored engineers into technical leads.
- Standardized documentation and decision trees across distributed teams.

Systems Analyst / Deep-Tier Troubleshooting Engineer

IBM (via Infosoft Inc) | Hammond, IN | Sep 2009 - Nov 2011

Deep-tier troubleshooting and automation across enterprise environments.

- Investigated complex system issues; navigated source code and logs to correlate errors with backend patterns.
- Scripted repetitive verification and support tasks to reduce manual effort.

SELECTED PROJECTS & CASE STUDIES

AI-Augmented Triage Operations — Adopted GenAI tooling (Copilot-class) for log summarization, code comprehension, and SQL generation, cataloging prompts and scripts in shared channels to drive best-in-class MTTR.

Escalation & Root-Cause Governance — Owned prioritization and resolution of complex workflow failures and anomalies as final operational authority, collaborating with Engineering to streamline fix cycles.

Knowledge-Management Architecture — Built decision trees and troubleshooting playbooks (175+ runbooks) in Confluence-class tooling to safely scale self-service resolution.

Data-Driven Friction Reduction — Aggregated telemetry and ticket patterns (KQL/Power BI) to isolate systemic friction and present data-backed business cases to Product/Engineering.

Triage Queue Integrity — Established SLA/SLO baselines and workflows preventing stale issues, eliminating 25,000+ stale incidents and 500+ alerts.

Cross-Functional Translation — Synthesized high-severity technical blockages into business-speak impact statements for executives, Tier-1 support, and business stakeholders.

LEADERSHIP & COLLABORATION

- Led and mentored global teams of 15-32 engineers across the US and India, growing individual contributors into technical leads.
- Central escalation authority and SME for high-severity incidents, coordinating Security, Engineering, Product, and business teams under pressure.
- Ran 1:1s, performance reviews, onboarding, and targeted coaching/enablement plans; built psychologically safe, high-accountability culture.
- Synthesized incident and reliability data into executive reviews driving investment and process decisions.
- Early operationalizer of AI/automation in production support and operations; champion of continuous learning.

CERTIFICATIONS

- Microsoft Certified IT Professional — Azure Infrastructure Solutions (70-533, 70-534)
- Microsoft AZ-900 — Azure Fundamentals
- Google Cloud Computing Foundations
- Google — Introduction to Generative AI
- TechMahindra AI White Belt

EDUCATION

- Bachelor of Engineering in Computer Science Engineering, JNTU, Hyderabad (2008)

PROFESSIONAL PHILOSOPHY

Be the bridge: turn deep-tier engineering logic into operational workflows and business-speak, standardize triage so resolution scales, and use AI to eliminate friction for customers and developers alike — making the whole team smarter, not just faster.
